Application/Control Number: 09/961,092

Art Unit: 3753

This office action is responsive to amendment filed 07/15/2003.

Claims 1 and 3 – 12 are pending.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 3 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Griswold (US 3,336,843).

Griswold discloses a valve comprising:

- (a) A first housing (10) including a first chamber (14, 15) formed therein having an inlet associated with (14) and an outlet associated with (15) for a first fluid;
- (b) A second housing (11) including a second chamber (44) formed therein;
- (c) A flexible diaphragm (27) having an outer peripheral edge portion abutting the second housing (11) and closing off the second chamber (44);
- (d) A back pressure member (19, 24,30) moveably disposed in the first chamber (14, 15) of the first housing (10), wherein the first chamber (14, 15) is defined by the back pressure member (19, 24,30) and the first housing (10), and wherein the back pressure member is moveable to a closed position (Fig. 1) in which the back pressure member seals off the passage between the fluid inlet and the fluid outlet;

Wherein the flexible diaphragm (27) is fixed onto and moveable together with the backpressure member, whereby the pressure in the second chamber (44) determines a preset fluid pressure required to maintain the backpressure in a steady position.

Application/Control Number: 09/961,092

Art Unit: 3753

Regarding claim 3, Griswold also discloses at least one port (43) in the second housing (11) for the supply of a second fluid to the second chamber (44) to set the pressure in the second chamber and thereby determine said preset fluid pressure required to maintain the back pressure member in the steady position.

Regarding claim 4, Griswold discloses a bore (defined by (16)) in the first housing (10) to which the inlet and the outlet open to, and wherein the backpressure member is slidably mounted in the bore.

Regarding claim 5, it is noted that a sleeve member (16) is provided within the first housing (10) and providing said bore for the backpressure member, wherein the opening in (16) is closed by the backpressure member.

Regarding claim 6, it is noted that holding means (36, 35) attached to the flexible diaphragm (27) and the backpressure member whereby the backpressure member and the diaphragm are moveable together.

Regarding claims 7 and 8, it is noted that the second housing (11) includes (a) spring (49) that provides an adjustable load on the diaphragm (27) and thereby adjusts the effective fluid pressure in the second chamber (44) and (b) valving associated with the pipe (43) (Col. 3, lines 11 - 15) that also adjusts the fluid pressure within the chamber (44).

Regarding claim 9 it is noted that it is a combination of claims 1 and 5 whose individual rejections are set forth above.

Claim 10 has the same limitations as Claim 6 and Claims 11 and 12 have the same limitations as claims 7 and 8 respectively.

Application/Control Number: 09/961,092

Art Unit: 3753

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kleczek, Clayton and Alsobrooks et al. disclose various arrangements of diaphragm-based pressure regulators.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramesh Krishnamurthy whose telephone number is (703) 305 - 5295. The examiner can normally be reached on Monday - Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Rivell, can be reached on (703) 308 - 2599. The fax phone number for the organization where this application or proceeding is assigned is (703) 872 – 9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 - 0861.
